## JOHN PALM DIES SUDDENLY

John J. Palm, aged 67, passed away suddenly from a heart attack at noon on Tuesday. He had been out in the forenoon working with a number of men on the irrigation ditches of the Town, went home to lunch apparently in his usual good health, and passed away during the luncheon hour.

Deceased and his family came to Raymond from the United States about twelve years ago and with his wife and five daughters had made permanent residence here. He was a carpenter by trade, and worked at this whenever he could, and when unable to follow this trade he worked for the town at the odd jobs about town. He was quiet and unassuming and respected by all who knew him for his dependability and honesty. The sympathy of the community goes out to the wife, who is an invalid, having been confined to her bed almost continuously for over a year, and the girls.

Funeral services were held held this afternoon in the 2nd Ward Church with Bishop Walker in charge.

## HONORS COME TO T. GEO. WOOD

T. Geo. Wood, Manager of the Canadian Sugar Factories, Ltd., and President of the Taylor Stake of Zion, was chosen President of the Prairie Division of the Canadian Manufacturer's Association at the annual meeting in Winnipeg on Tuesday.

Mr. Wood has been an active member in the organization for many years and has served as local President and also on the directorate. We congratulate our fellow townsman on his appointment.

## BASKETBALL SATURDAY NIGHT

Fighting it out for the Intermediate championship of the Province the Calgary Sharpshooters and the Lethbridge Y Jokers will meet on the Opera House floor Saturday night in the first of a two game series total points to count We understand that efforts are being made to set the time of the game so that it will not conflict with the Conference meeting Saturday night and it may therefore be held up until 8:30.

## NEWS NOTES

Mr. and Mrs. Clifford Dahl were the speakers at the 2nd Ward Church Sunday evening last, Clifford reporting his six months mission and his motor trip home thru the States.

* * *

Mr. and Mrs. O. H. Snow, Mr. and Mrs. Golden Snow and Mr. and Mrs. J. O. Turner were at the Cardston Temple Wednesday, the occasion being the annual Snow Family day. There were also a number of the family relatives from Cardston.

* * *

Regular Town Council meeting was held Thursday night of last week, with the pay roll and routine business occupying the time. A special meeting was held last night when a number of by-laws were passed for filing.

* * *

Following clashes between strikers of Calgary's unemployed and non-strikers, the City Commissioners were preparing a brief for presentation to the City Council, asking for deportation of United-States born E. C. Hooper, president of the unemployed association and director of the strikers. Hooper said he would fight any such proceedings.

## CORRESPONDENCE

The following letter is self-explanatory, and was received by Lloyd MacPhee the end of last week.

Saskatoon, April 12th

Dear "Mac":-

Well old man we arrived here safe and sound this afternoon and were met by officials of the Saskatoon team. This trip is just like a mery-go-round. You no sooner make new friends when you have to leave them and start all over again.

Ted has asked me to write you at this time on behalf of the Western Sports Centre basketball boys. Every man from Ted and Pete to myself wants it known that the treatment they received at your town will not be forgotten for sometime. It is tough on a visiting team to arrive in a strange place but the way you and your fellow citizens came to our rescue was grand.

Please pass along our thanks to Goldie Snow, Ernie Nilsson, Mr. Heggie, Mrs Stevenson and Mrs. Boyson and the two Utah Charlies. If you ever come to Vancouver please don't forget to get in touch with either Ted Milton at 404 West Hastings street, Pete Winckler at Parsons Brown Ltd. or yours truly at the Vancouver Sun. Thanks again for the many pleasant hours enjoyed at Raymond.

Your real pals from the Coast,

Pat Slattery.

## OUTING AT SCHOOL OF AGRICULTURE

Because of the weather man going on a spree, the outing planned by the Rotary Club members and their families for Whoop Up was transferred to the School of Agriculture, here through the kindness of Louis Brandley, who has the ground and buildings in charge, the mechanics building was cleaned out and the two large rooms used when it was storming, and then the lawns were made use of when the sun shone and outdoor sports were possible.

Lunch was prepared and served in the building, then softball, races, finding the hidden easter eggs and what not was carried on outside, and the ice cream cones were served and passed around about 3 p.m. A heavy rain and hail storm just about this time rather broke up the party and the cars started pulling out.

Despite the fact that well laid plans had to be altered greatly those present enjoyed an enjoyable time, and most of the Club members participated in the program and sports.

## NEWS NOTES

Gerald Gibb, shop work instructor at the High School has been in Calgary attending the Teaccher's Convention this week

* * *

The final game between Trail Smoke Eaters and Cornwall Flyers went to Trail with a 4-1 score. Local listeners said if it hadn't been for Paras, the Cornwall goalie, the score would have been 50-1. Paras was unbeatable and we understand is signed for a tryout next winter with the Montreal Canadiens.

* * *

The seven months old baby of Mr. and Mrs. Jack Smith of Nanton district, was suffocated last Thursday evening by a woolen blanket covering its face, while the parents were attending a party. The babe was left in a car and the parents went out several times and looked in and though the child was sleeping, and it was not until they were ready to leave for home that they discovered the tragedy.

# Hon. Solon Low Addresses Meeting

With 200 people present, and Alvin W. Jones, president of the local group in the chair, Hon. Solon Low, Provincial Treasurer spoke for two and a quarter hours in the Opera House here Saturday night, reporting on the recent session of the legislature, the reasons back of some of the laws passed in previous sessions and the hopes of the Government with respect to the future. He stated that he still believed firmly that the principles of Social Credit would solve our problems, and stated "Were it not for my desire to do something for the common people who have been exploited for so long, I would not continue to carry the responsibility that has been given me. Social Credit seems queer to many people, but this is because they have not studied it deeply enough.

Referring to the fight against finance, he stated that all efforts so far had been to bring these interests out into the light and show the people who it was that had been preventing the progress of Social Credit. Finance had always shuned publicity, because it had secrets it did not want the common people to know. In speaking of the acts disallowed by the Supreme Court of Canada and now before the Privy Council, he said that in the declaring ultra vires of the Social Credit Act, the Supreme Court had done something never before done in the history of its existence, in that it had passed an opinion on something that had never been referred to it. However, the Social Credit bill had now been repealed, and the privy Council could decide the Press Bill, the Bank Taxation Bill and the Credit regulation Bill on their own merits without any reference to any other bills. Whatever the decision, however, the fight was going to go on, as the Alberta Government was determined to put the burden of taxation where it rightfully belonged and to provide interest free money for Alberta people. If the chartered banks would not co-operate in these plans, then they would set up their own banking system to carry out their plans, said the Provincial Treasurer.

He spoke of the recent Home Security bill and explained the $2,000 deposit now required from mortgage companies before they commenced proceedings for a foreclosure and stated this as done so that even if a family lost their home in this manner, they would have the $2,000 with which to start building another one. He also stated that a tax on mortgage was just as fair as any other, and that for years these mortgage payments had been going to Eastern provinces, and the Eastern provinces, had been benefitting through income tax, succession taxes, etc., while the Province where the money had been made was not getting a red cent out of this; the same was true of Government bonds sold in recent years, they were tax free, and from now on any Alberta bonds sold would be subject to taxation the same as any other money making interests.

Speaking of the Production Tax, which had been introduced into the House, but not passed, the speaker stated that it was felt that this would be a much more equitable tax than the present land tax, and that if proceeded with it would eventually do away with all other forms of taxation against man's lands. In this tax, poor land would pay a small tax, crop failures would leave the farmer without any taxes to pay, and he would not be piling up arrears against already over-burdened lands. Then too, it was hoped that a fund would be created out of this collection that would enable the Government to supply FREE feed and seed in case of districts where crop failures through drouth, hail or frost, had rendered the farmers unable to provide these things for themselves. There was no intention of passing the bill at this session when it was introduced, but the Government merely wanted to get the reaction and the ideas of the people with respect to it, and then they felt they would have something to go ahead on.

He referred to the brief that had been prepared with respect to freight rates, and showed from schedules that transportation companies were unfair to Alberta, in that some classes of goods could be shipped from Eastern Canada through the mountains to Vancouver and back to a point 60 miles east of Edmonton, as cheaply as they could be shipped that far west into Alberta. He mentioned several specific items, and especially those things which Alberta farmers and citizens had to have. He warned the people not to countenance consolidation of our 2 railways as this would put us into the hands of a monopoly that would make it harder than ever.

Referring to the Social Credit Board and rising to its defense, he said that it had rendered the first national accounting of natural resources and potential wealth, of the Province, in its recent report, that had ever been made in the British Empire, and that he felt its labors had been worth all it had cost.

## NEWS NOTES

Mr. and Mrs. I. B. Roberts and Isaac and Bishop Hicken were at the Temple Wednesday last.

* * *

Mr. and Mrs. Lloyd Dahl moved from the Security block to the Rulon Dahl home on Tuesday of this week.

* * *

T. Geo. Wood, Manager of Canadian Sugar Factories Ltd., has purchased a new dark blue Studebaker President eight cylinder car.

* * *

Mr. and Mrs. Athol Cooper and children of Hill Spring were here for the Easter holidays, guests of Mr. and Mrs. Reg. Cooper.

* * *

Hon. W. A. Fallow, who had been advertised as a speaker for the Saturday night meeting, was detained in Edmonton on important business and did not reach Raymond

* * *

The eight year old son of Mr. and Mrs. Wm. Mertz of Stirling, passed away in the Lethbridge Hospital on Monday, and funeral services were held in Stirling yesterday at 2 p.m. We extend our sympathies to the parents in their sad bereavement.

* * *

Monday was quite a blustery day, with rain falling five or six times during the day, and quite a heavy fall of hail coming about 3 p.m. Hikes and picnic parties were greatly interfered with and most of them were cancelled.

## QUARTERLY CONFERENCE BEGINS SATURDAY

The Quarterly Conference of the Taylor Stake of Zion will commence Saturday afternoon at 2.30 with an evening session, and three sessions Sunday ,the first one to convene at 10 a.m. Sunday morning. President T. Geo. Wood will be in charge.

Representatives from Salt Lake City will include Elder Don. B. Colton of the Deseret Sunday School Union Board, a former Utah Congressman and a man who has served years in the mission field for the Church Mrs. Rufus K. Hardy and Mrs. W. Lambert, both of these sisters also having spent many years in the New Zealand Mission with their husbands.

It is a Primary and Sunday School Conference primarily, but there will be the general open session Sunday afternoon and evening, and all the meetings will have information and educational features of great benefit to every person.

## MUTUAL CLOSING PROGRAM

The winter's Mutual work in both Raymond wards was brought to a successful close Tuesday evening when similar programs were rendered in both. A showing Statue in Marble," musical programs including choruses, etc., and a one-act play featured the program, after which in the First Ward the Young ladies played host to the young men in the attendance contest and in the 2nd Ward the Golds entertained the Greens who were winners in the attendance competition in that ward.

Dancing concluded the evening.

## BAKERY CHANGES HANDS

By a business deal during the holidays, the Maple Leaf Bakery changed hands and Alvin W. Jones is now the Manager. A. W. needs no introduction to the business people of Raymond, having been in the business before. He is changing the name of the Bakery to the Home Bakery and will cater to the desires and needs of the people of Raymond and district.

S. L. Jones who has operated the Bakery for the past few years, is planning on entering the agriculture field, and is at present in Rosemary looking for land. We bespeak the patronage of the public for the new bakery management and wish Stan success in his new ventures.

## A. C. MAY BE YOUTH TRAINING CENTRE

Hon. D. B. Mullen is credited in the Lethbridge Herald with the following

Raymond Agriculture School and farm may become a youth training centre, Hon. D. B. Mullen, minister of agriculture, said. "We intend to do something to develop the farm itself as an outstanding farm in that district," he said upon his return from a 1000-mile journey through south Alberta. The farm has been closed since 1936.

## E. E. REITHMAN WINNER IN CONTEST

E. E. Reithman, local decorator, won the open class in the recently closed colorizing contest of the Satin-Glo paint company conducted by the Hoyt Hardware of Lethbridge. Congratulations to Mr. Reithman.

In the special mention column were 36 students of the Raymond Public School, 15 from Magrath and one from the Stirling school.

## UNION JACKS ARE FETED

Members of the Union Jacks and their partners were guests of honor at a well arranged banquet in the Scout room of the 2nd Ward Church on Friday night last. Mrs. Golden Snow and Mrs. Rayo Woolf had general charge of the arrangements and they were assisted by the wives and escorts of others of the guests.

At 8:30, 58 people sat down to a very fine supper, and after the supper an hour was spent in short speeches and toasts, the following taking part:

J. Golden Snow Master of Ceremonies, Ern Nilsson, Dean Rolfson, S. I. May, S. W. King, Curly Sloan, J. H. Walker, Delia Woolf, Mrs. Walker, and W. C. Stone.

At about 10:15 the crowd sang several community songs, concluding with the National Anthem and then all went home after a very pleasant evening.

## UNITY REACHED ON ROAD

A well attended meeting of representatives of the Raymond and Stirling Boards of Trade and the Municipal Council of Sugar City was held in the Town Hall to discuss the question of an all-weather road between Raymond and the Sunshine Trail. John F. Salmon was named Chairman of the meeting and S. I. May as Secretary.

After introducing the purpose of the meeting, the following spoke on the road question voicing their opinions: Frank Taylor N. W. Peterson, J. P. Barton, E. N. Peterson, T. A. Spackman, John Powelson D. W. Mendenhall and the following resolution was passed unanimously, to be sent to the Minister of Public Works:

"Resolved that this meeting go on record as being in favor of unitedly asking the Department of Public Works for an all-weather road connection between Raymond and the Sunshine Trail; and that a committee of three, one from the Stirling and one from the Raymond Boards of Trade and one from the Sugar City Municipality be appointed to interview the Minister and his colleagues to press for this link."

The commiteemen appointed were: T. A. Spackman of the Stirling Board, John F. Salmon of the Raymond Board and N. W. Peterson from the Municipal Council.

The Hon. Solon Low, who had been detained and late in getting to the meeting voiced his approval of what the meeting had done, stated that the Hon. Mr. Fallow had been detained because of illness and would be down in this part next week when the matter would be gone into.

Miss Beth Walker was a Great Falls visitior this week.

Fred J. Stewart of Magrath was in Raymond on Tuesday.

Read the big paint ad. of the Raymond Mercantile in this issue of the paper. It means savings to you.

The new home of Mr. and Mrs. L. C. Woolley is going up rapidly. Wednesday evening it was all closed in and work going on inside. Practically all work is donated, and the family and the Committee in charge are deeply appreciative of the splendid response they have received from Raymond people and tradesmen.

Samuel Riley Clark, 68, of Stirling and well known in Raymond, passed away in the Lethbridge Hospital on Good Friday from pneumonia and was buried in Stirling on Monday after services in the L.D.S. Church. A number of Raymond people attended the funeral services.

## KILL! KILL! KILL!

On with the dance! Step on it; we are late Hello, there are a couple of cars that have run into each other head on! Hurry past! There are dead and wound ed people lying there on the grass. We might have to go to court as witnesses, or have to carry some of them to a hospital! Shoot the gas to her. You can pass that truck before we get to the top of the hill. Hurry! Gosh, you almost hit that old lady! Why do people allow women as old as that to get out on the highway? They are all hen-minded. We might have hurt her. There is a hole you can break through in that line of traffic. Give her the gun! Gee that was close! Did you hear that fellow swear? We didn't hit him. What's he got to complain about? Blow that horn and make that guy get over where he belongs! Why, the fool won't give us the right of way! He can't be going more than forty-five. How can he expect to stay on the pavement at that pace? Hit her up around the rightside there! Boy, that scared him! Maybe that will teach him to keep over where he belongs! I thought for a min ute we were going to turn turtle. Look, there is another accid ent! That car is on its top with its wheels in the air! Looks like a bug on its back, doesn't it? There was blood on the grass. Some one must have been badly hurt. Crazy fools, they don't know how to drive, yet they get right out into traffic. Watch that woman! She is driving all over the road! Run up alongside her and then give her a blast on the horn! Whew! Didn't her fender nick ours when she swerved? I believe it did. Thank heaven she didn't lock fenders! Cut around that fellow. Never mind the curve. There isn't any thing coming. Crash!

Where am I? What has happened to me, doctor? My leg has been taken off? My God!—Kiwanis Magazine.

## DON'T FORGET GRASS

Recently the editor of a well-known agricultural magazine was asked why his publication gave so much space to grasses and forage crops. "I must confess, he said, 'that I was amazed' I had taken it for granted that everyone knew that grass is the basis of human existence on this earth. Without grass we would have no bread, no meat and in a short time, no vegetation on the face of the earth."

## WEEKLY LETTER
## FEED ECONOMIES IN MILK PRODUCTION

Do you know that the average production of all so called dairy cows in Alberta is only about 4,000 pounds of milk per year, which with a 4 per cent butterfat content would yield 160 lbs. of fat per cow? Do you know that on the average a cow should yield at least twice this amount in order to pay for feed, care, equipment and return a profit? These are the facts and consequently it takes no more than average intelligence to see that by and large the dairy industry in Alberta is operating at a loss.

It is of course easy to state that higher prices for products would overcame this to a large extent but even this does not get at the root of the problem. It is usually considered that approximately 50 percent of the total cost of producing milk is the item of feed, with the other 50 per cent being labor, buildings, other equipment, cost of reproducing the herd, ect, During the year, 1937, the average feed cost of producing 100 lbs. of milk in the Lethbridge Experimental Station herd was 70 cents with cows producing an average of 10,655 pounds of milk and 363 pounds of fat. As production per cow is decreased the cost per 100 pounds of milk and per pound of fat increases and makes profit more difficult to obtain. Even with cows of relatively high production this is very clearly indicated by the data from two cows at the Lethbridge Experimental Station. Both completed their lactations under fairly comparable conditions in 1937 and yet there was a difference of 20 cent per 100 pounds of milk in the cost of feed. The data are as follows: Cow No. 1 produced 14,035 lbs. of milk at a feed cost of 56 cents per 100 pounds and Cow No. 2 produced 8,521 pounds of milk at a feed cost of 76 cents per 100 pounds. The cost of feed per pound of butter fat was 16 cents and 22 cents respectively.

Unfortunately milk production is on most farms looked upon as a sideline and little or no consideration is given to cost of production. Thus instead of being a profitable income it becomes a source of loss to the producer. What then is the solution? Part of the solution is to view milk production on a business basis and if milk cannot be produced at a profit it should not be produced at all. The easiest way to improve the situation is to improve the quality of cows being milked. These cows need not be purebred but they should at least be of good dairy type and sired by a purebred dairy bull.

In the areas in which feed is often scorce is should be good busines to have as few animals as possible and in places such as that a cow which will produce 8,000 pounds of milk should be worth more than two cows which produce 4,000 pounds each The mere saving of feed for one cow would be worth dollars and cents to any man and more so when feed is hard to get. This is one phase of feed conservation to which altogether too little attention has been given and yet one which on the whole would do as much as anything to relieve feed shortage which occurs so regularly in certain of our dry areas.

Even in areas where feed is usually plentiful the same saving in feed through the use of better cows would be important.

Geo. McRae of the Mid West Paper Sales was a Raymond visitor on Tuesday.

## SEND IN YOUR NEWS

There has never been a newspaper printed that satisfied everybody. But there is a very simple method by which better newspapers can be produced and that is for those who subscribe to take an individual interest in seeing that they get more local and personal news. If you have visitors or if you have been on a visit, send or phone the information to The Recorder. Every little item of a local or personal nature helps that much to make a still better newspaper. That is how you can help make your weekly interesting, and you are invited to start at once.

## Our Edmonton Letter

(By T. B. Windross)

Edmonton, April 18—The scene of political acition had shifted, as this week opened, from the provincial capital at Edmonton to the towns villages, and farming communities throughout the Province.

In all of them the deeds of the legislative session which closed earlier in the month were being studied and valuated, and each constituency was getting ready to ask its member some questions about his actions, and the actions of the whole house when he shows up to present his own report.

The production tax, by which the government was given power to take from every farmer seven per cent of the farm's production in goods or in money came in for more heated and more widespread condemnation from farming communities and agricultural interests than has greeted probably any other piece of legislation adopted by any Alberta legislature for many years past. The protests against the act came from virtually every corner of the province, and from drouth areas as well as from the districts which always have good crops. It came from livestock producers, dairymen, wool growers, sugar beet growers and vegetable growers as well as from farmers producing only grain.

One big protest meeting was held at White school near Lethbridge. There farmers declared that the act would increase their individual taxes, levied by the Provincial government, as much as ten times.

Norman F. Priestly, Vice-president of the United Farmers of Alberta, recorded the protest of that organization; as an extremely conservative estimate, he said doubled taxation would be the result of the act. Ratepayers of the Lethbridge Northern Irrigation district went on record as opposing the act strenuously and asked their executive to place the protest before the government. At Lloydminster, Social Credit supporters were among the first to protest. "A $25 dividend sounds much better to farmers than a seven per cent tax," said one of them. Another farmer said he viewed with alarm "a tax on energy for the support of laziness." Still another decribed the act as obtaining money under false pretences."

Meantime Premier Aberhart was basking in Easter sunshine on the Pacific coast, taking a holiday. Other government officials explained an amendment which had been inserted into the act as meaning that the seven per cent tax was in effect a lien on that portion of the farmer's production until the produce was marketed at which time the government would collect the tax. If the produce were not marketed, said one official, then it would not be taxable, altho the government would retain its lien on seven per cent of the total. Social Credit leaders claimed that the hostile attitude of many farmers had been changed at Social Credit meetings "when the tax was explained to them."

No announcement about the date of the reference of the act to the Supreme Court of Alberta for a ruling on its validity had been made as this week opened, althoughit had been stated by the government during the legislature session that the reference would be made to the court "as soon as possible," and that the act would not be made effective by proclamation, until after that had been done, and in any case it would not be effective this year. Some possibility was seen that as a result of the storm of resentment raised throughout the province by the legislation, the whole idea of a production tax would be dropped,

Municipalitles would be among the hardest hit by the act,, since "it takes from municipalities the control of municipal financing—something upon which there has been very little comment," declared one of the leading authorities in the province. The provisions of the act make it possible for the minister to upset the assessment roll of any municipality and deprive it of expected revenues, he said.

As the end of another fiscal year of the Dominion Government drew near, many towns throughout Alberta still were wondering whether they and the districts surounding them would be deprived of banking service as the result of the new increase in the Provincial government's tax on banks. The new additional tax of $105,000 means that the banks must pay the provincial government a total of $325,000 during the next year.

All except a few of the 260 bank branches operating in the province now are being operated at a loss to the banks, and fears have been expressed that the banks may be forced to close at least some of the losing branches, which up to now have been kept open as a service to the province's rural population. Because a large amount of that $325,000 provincial government tax on banks is levied on a per branch basis, the banks could save a substantial sum by closing down branches on which they already are losing money.

It remains the individual problem of each community whether its bank will remain open in view of the provincial government's taxation which has been increased each year since the present government came into power.

# Up Through the Clouds

## by Beulah Earle

INSTALMENT 20

**Monty Wallace has just arrived in California, having broken the East-West cross country airplane record. Natalie Wade, mistaken by him for a newspaper reporter, writes the exclusive account of Monty's arrival, and succeeds in securing a trial job with a paper in exchange for the story. Natalie becomes attached to Monty.**

**Although she discovers Monty's love for her is not sincere, Natalie admits that she loves him. She is assigned by her paper to report Monty's activities for publication. Jimmy Hale, the newspaper's photographer, becomes Natalie's coworker.**

**Natalie interviews Jabe Marion, a wealthy airplane builder, who decides to build a record-breaking 'round the world plane for Monty. Marion's daughter, Sunny, exquisitely beautiful, is attracted to Monty. She invites Natalie to dine with her, when they meet the aviator unexpectedly.**

**Natalie discovers that Sunny is jealous of herfriendship with Monty, and that she is trying to prevent them from being alone. After driving to a mountain resort with Sunny and Jimmy, Monty again declares his love for Natalie.**

**Sunny attempts to drive Natalie from Monty's attention by climbing a high wall. She almost loses her balance and is pulled back by Monty. Jimmy later asks Natalie to consider his love for her if she refuses Monty.**

**Natalie induces Monty to set out with her in an airplane search for two missing aviators. At dusk Monty lands the plane in the open country, where he and Natalie must spend the night.**

**Resuming the search in the morning, they finally locate the fliers. Natalie wires the story to her paper. That night at dinner, Marion announces a non-stop 'round the world flight, with Monty piloting the new plane, 'Sunny Marion.'**

**Monty's plan is to have ten re-fuelling stations along the route, where pilots are to go aloft to refuel his plane. Monty flies with Natalie to New York, where he will begin the flight eastward. They are followed by Jimmy and Sunny.**

**The day before the flight, Monty once more declares his love to Natalie.**

---

**She could think of nothing except that Mont was out there flying for her. It occurred to her presently that he would be reported occasionally on his flight to New York. She went back to the office and sat over the news wires there till the next morning. Then she rushed for the field office and the short wave radio receiver.**

**It was only a little after dawn in New York when Mont refueled there. He had broken all records across the continent.**

**When she knew that Mont was out over the Atlantic she tried to go home again but before she had been able to make a start she turned back. She would stand by at the radio set until he was safe across. That much, at least, she could do.**

After a while Sunny Marion came to sit beside her but the girl said nothing and Natalie found no speech in her heart or on her lips that would not reveal how much she knew.

It seemed at times as though Sunny was in terror part of that day and the following night but she could not be sure. Together they waited beside the little radio operator who dozed in his chair between calls, depending on the buzzing of the receivers to wake him when news came.

Occasionally Natalie sent out for something to eat but Sunny would take nothing but a little coffee.

Sometimes Natalie thought that the younger girl was breaking under the strain but she would not leave. Her father came in from time to time and appeared anxious about her. But she sat silent beside the radio desk and seemed to hear nothing but the occasional hum in the black receivers at the operator's ears.

It was not till Jimmy Hale came in, that she looked up and smiled. And presently Jimmy got her to walk about with him and finally to leave the field.

And within half an hour after they had left, the station office was roaring with the news that Mont Wallace had broken another record, the cross-Atlantic flight record, and had refueled at the first control station in France.

After that, wild horses could not have torn Natalie away from her post beside the radio operator.

She would not sleep. She hardly ate. She hardly moved from the office chair where she sat with a typewriter at her hand.

At last she had the envelope in shreds.

Jim and Sunny came back, joining her in the vigil as that leg of the trip began. Reports were that Mont was pale and looked very weary as he crossed the control station. Then the operator's yell told them all that Mont was safe across the Siberian wastes. He was headed for Bering Strait and at last for Nome.

Sunny Marion cracked then. Natalie saw her face when that word of further and further success came. She knew what the girl must be going through and moved swiftly to do what she could to comfort her.

But Sunny stood up shrieking. "Jimmy! Jimmy! Take me out of here."

Jimmy Hale stepped quickly to the girl's side and led her out of the office. At the door he looked back once. Then he grinned and went out as though he, too, knew the dreadful significance of that flight.

Natalie sat back in her chair. It was too bad about Sunny but there was nothing that Natalie could do.

The other girl's face had been terrifying when she stood up and screamed, but Natalie's mind was already back with Mont Wallace knowing that now he headed once more across the dark waters on his flight to Nome.

Others were coming into the station now. The word had gone out, of course. Jabe Marion came and sat beside the operator.

Natalie wrote her story—or began it but she had to change the lead before it was finished for the operator suddenly sat bolt upright and talked rapidly as he translated his message.

"Wallace down at sea," he said. "Steamer in Bering Strait reports seeing wreckage of plane in fog. Hunting for it now. Probably Wallace."

Natalie's fingers beat at the typewriter keys. She felt it was the only thing that saved her from collapse, that necessity of getting out the story of the tragedy.

But when more news came, when it told of the steamers mobilizing for the hunt out there in the fog, when it told of bits of wreckage that had been picked up, she almost believed.

Then there was a sudden stir at the radio desk.

Natalie leaped from her place and stood beside the operator as he read the message aloud.

"Wrecked airplane identified," he said. "It's not Wallace, not the Sunny Marion. Russian ship trying flight to Nome. Pilot safe."

There were cheers then but they died quickly. Where was Mont Wallace? Where was the gallant plane now many hours overdue at Nome?

Uncertainty made the suspense more terrifying now than before. Natalie telephoned the office quickly and sent corrections for her story. Wallace might be down but this was another plane wreck.

And even while she spoke there was a shriek from the little group on the other side of the room.

"He's safe. He's safe. Vancouver reports him. He dodged the fog. Cut straight for Vancouver instead of Nome. He's safe. He's in. He's in. Nothing can stop him now."

Natalie sobbed for joy and screamed into the telephone to Mack Hanlon.

## PROPOSE PROBE GASOLINE PRICES

An inquiry into the spread between the wholesale and retail prices of gasoline was urged in the legislature last week in a resolution introduced by Mrs. Edith Rogers, Social Credit member for Ponoka, seconded by James Hartley, S. C., Macleod. The resolution was adopted.

Endorsement of the resolution was given by Hon. E. C. Manning, Provincial Secretary.

One of the main provisions of the resolution asked the government to consider the advisability of taking over the wholesale and retail distribution of petroleum products in this province.

Discussing the resolution, Mr. Manning said that the government had been giving attention for some time to means of bringing about lower gasoline prices.

He pointed out that the province was awaiting the findings of the deferal tariff commission which recently investigated conditions in the oil industry in Alberta. Also, the province was continuing to assemble data on the subject.

Both Mrs. Rogers and Mr. Hartley pointed to the need of action in view of the high retail price of gasoline, compared with what the producer receives.

Some years ago the Alberta Motor Association assembled considerable material on the gasoline price situation, later submitting a brief prepared by Mr. C. H. Grant, K. C., counsel for the association, to the dominion and provincial governments. Thus, the A.M.A., having taken a prominent part in demands for lower gasoline prices, is watching the outcome of the resolution passed by the legislature with special interest.

WATER-COLOUR TINTS FOR RESTFUL LIGHTING

## HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

### WHAT TO EAT TO BE HEALTHY

NUMBER TWO

A deficiency of any of the essential foods known as vitamins, minerals, proteins, fats and carbohydrates endangers your health. If any one of these necessary food elements is missing from your diet, it will result in a gradual or, in some cases, a rapid lowering of your level of health. Your vigor will be impaired. You will probably feel what is commonly known as "seedy", and if this deficiency is marked and continues for any length of time you will die.

You have all heard of substances called vitamins. There are at least six of these substances all of which are essential for health and life itself. They have one thing in common, the daily amounts required are extremely small. For example, one pound of vitamin D would cover the needs of the average adult for over a billion years, yet without it we would die. Vitamin A is essential for the health of the mucous membranes of the eyes, nose, throat sinuses, bronchial tubes, oesophagus, stomach, intestinal tract and the genito-urinary passages. Vitamins B1 and B2 are necessary for the nerves, skin, and the normal burning up of sugars and starches in the body. A lack of vitamin C affects the miles and miles of capillaries throughout the body, while vitamin D is essential for the normal formation of the bones and teeth. Without vitamin E, animals cannot reproduce themselves.

We all know that a lack of iodine causes goitre, and a lack of ironanaemia. Copper is necessary to get the iron from the food into the red blood corpuscles, and calcium and phosphorus make up over 95 per cent of the mineral part of bones and teeth. Proteins build up the body cells and are necessary to keep them in repair. Fats and carbohydrates supply energy, which the body uses to produce muscular effort and heat.

Carefully conducted investigations have shown that when your diet is just slightly lacking food elements, your resistance to infections, such as colds, bronchitis, etc., is definitely lowered, so that you catch these diseases easier and have greater difficulty in recovering than when your diet is adequate. This minor deficiency of any of the necessary food elements in your diet will probably not produce any one specific symptom, but still, you will not carry on at the highest possible level of good health.

So it is very important for us to know the food elements we need, how much of each one of the food elements we should have and where we can get it. through proper nutrition we can secure increased health and happiness, greater vigor, better resistance to disease, and longer life.

The next article in this series on "What to Eat to be Healthy" will tell you what foods to eat to secure an adequate supply of Vitamins A, B1 and B2.

Tom Mitton, Manager of the *Bank of Nova Scotia at Lethbridge* was elected President of the Lethbridge Rotary Club at a meeting of the elected directors last week Bob Paton and Max Hoffman were elected vice-presidents.

## Where The Reign of Winter Ends

Air-conditioned travel on a de luxe Canadian Pacific train brings the holiday seeker to Victoria. He has passed through all the rigors of winter, subzero temperatures, blizzards and a whole continent swathed in white, but, when the Rockies are behind him and he has traversed the eighty-odd miles of the San Juan de Fuca straits, he enters, at the conclusion of his trip, a new land—Canada's Evergreen Playground—Vancouver Island with Victoria at its southern tip, and he has exchanged winter at its peak for summer.

Fourth largest in the chain of great Canadian Pacific hotels across the Dominion, the Empress Hotel at Victoria offers him all facilities. Located in a beautiful [illegible] of Victoria's inner harbor, the Empress Hotel [illegible] such unique features as its [illegible] conservatory with fountains playing amid masses of flowers and the nearby Crystal Garden with glass-enclosed swimming pool, palm-bordered promenades and warm salt-water bathing.

The traveller steps into summer at once with new sights, brilliant sunshine and the tang of Pacific breezes, minimum rainfall and ideal temperature variations. Golf is at hand on the championship Royal Colwood Club course where, March 7-12, there will be held the Annual Winter Golf Tournament for the Sir Edward Beatty Challenge Cup, the Chamber of Commerce Trophy, Victoria Rotary Club Rose Bowl, the Matson Inter-District Team Cup and other valuable prizes.

Fishing, yachting, riding, motoring, tennis are available for all, while the environs of Victoria have for major attractions, the Malahat Drive with its ever-changing incomparable views; the Butchart Gardens, famous on two continents; and the Dominion Astro-Physical Observatory. An evergreen playground in the depth of winter is Victoria's gift to Canadians on their own soil. Layout shows upper left a scene in the Crystal Gardens; upper right, the yacht harbor and the parliament buildings; lower left, a view of the Empress Hotel and lower right a tense moment on one of Victoria's golf courses.
